All bibliotheca RFID tags are compliant with ISO 18000-3 mode 1 and ISO15693 air interface protocols. The SLi-1 and SLi-2 chips are capable of storing data in the industry standard ISO 28560 format.

In addition, all bibliotheca RFID tags include a 50-year or 100,000 read-write data retention guarantee

All data on a tag, including the item identifier field, can be fully rewriteable and should be: non-contact programmable.

- reprogrammable.
- have memory size of 1024 to 2048 bits.
- operating frequency of 13.56 MHz.
- long-life e.g. guaranteed for the life of the item on which it will originally be affixed.
- adhesive-backed and one piece.
- Tag's adhesive material should be low acid, or neutral pH, adhesive.
