

6. Technical Specifications & BOO:

No	Requirements	QTY	Compliant Yes or No
Endpoint Protection for 1 Year			
1	Proposed product must have 20+ years expertise in anti-virus / malware research	1600	YES
2	Proposed product must be in Visionaries Category (at least) of Gartner Magic Quadrant		YES
3	Principal must have a local representative or distributor in the country.		YES
4	Proposed endpoint solution must have Machine Learning Technologies		YES
5	The proposed solution must support secure communication between management server and endpoints		YES
6	Proposed Suggested solution must be able to detect following type of threats: - Viruses (including polymorphic), Worms, Trojans, Backdoors, Rootkits, Spyware, Adware, Ransomware, Keyloggers, Crimeware, Phishing sites and links, Zero-day vulnerabilities and other malicious and unwanted software		YES
7	Proposed solution must provide signature-less components with the ability to detect threats even without frequent updates. Protection must be powered by static machine learning (ML) for pre-execution stages. Dynamic machine learning for post-execution stages; kill-chain on endpoints and in the cloud for Windows server and workstations.		YES
8	Proposed solution must provide integration with same vendors' Endpoint Detection and Response (EDR), Anti-APT solution for active hunting for threats, and incident response automation.		YES
9	Proposed solution must also include the following components in every single agent installed on an endpoint: - Application, Web and Device control - HIPS and Firewall - Patch management (Microsoft & non-Microsoft) - Remote Troubleshooting - Third Party Software Distribution - SIEM Integration - Encryption (Full Disk, File & Folder, Removable Drive)		YES
Cloud Servers Protection for 1 Year			
1	Solution must have a single management console for the protection management on private and public cloud which includes Amazon Web Services (AWS) and MS Azure	50	YES
2	Solution must have Hardware and Software Inventories and Licensing Management capabilities		YES
3	Solution required to be in accordance with the requirements of the General Data Protection Regulation (GDPR) for the protection of virtual infrastructures.		YES
4	Solution must have a protection for private cloud and public cloud which includes AWS and MS Azure.		YES
5	Protection against rootkits and auto dialers to paid sites.		YES
6	Support for VMware technology: vMotion, Distributed Resource Scheduler		YES
7	Support for Citrix technology: Virtual User Drive, Citrix Receiver, Multi-stream ICA, XenMotion Live Migration, Automated VM protection and recovery, Dynamic memory control.		YES

8	Support for Hyper-V technology: Live migration, Cluster shared volumes, Dynamic memory, Live backup.		YES
---	--	--	-----

- Complete technical features of the software meets the technical specifications conforming with the BoQ. Any additional feature(s) if so, may also be included.
- The installation should be compatible with Core 2 Duo with 4 GB RAM systems.
- Unlimited re-installation on any number of systems / operating systems.
- Free software updates and upgrades during licensing period.
- Supplier should be an Authorized distributor/reseller of proposed product.
- Bidder should provide training to concerned staff of IBA for the proposed solution.
- Bidder should quote the license subscription / support price for second and third year.
- A recent customer list (within last three years) with contact details including email address is to be submitted with technical bid.
- Mode of virus database update, and procedure in case of reinstallation, and centralized administration details to be included with the bid.

Item	Unit Price	Qty	Total
License End Point Protection	1814	1600	2,902,400
License for Cloud Protection Servers	8,198	50	409,900
Total			3,312,300
SST			430,599
Total Amount with SST			= 3,742,899 =

Grand Total Rupees (in words) Three Million Seven Hundred forty-two thousand eight hundred ninety-nine only.

- Two Persons International Training Cost is included in the attached Proposal.
